A.M. Form 906.

AIR MINISTRY, METEOROLOGICAL OFFICE.

South Kensington, London, S.W. 7.

QUERY FORM.

On examination of the return of observations made at Waddeton Court 1925

the following queries arise by comparison of the readings with the charts, &c. The Director will be obliged if the book containing the original observations may be referred to and this paper returned, with the required information, as soon as possible.

QUERY.	REPLY.
A comparison of your rainfall return for 1925 with neighbouring stations shows that on certain dates your entries are not in good agreement with the places set out below	Respecting fgins for January 25 February 27 I am not in a position to make enquiry as the Head Gardener have changed and should concur in any suggestion you may make as to those dates but as to Dec 27 the Head Gardener (an experienced observer) assures me that the correct fgins have been taken - may I point out that it does not necessary follow that Greenway Gardens 3 miles away Ashprington 4 and Paignton 4 miles should agree with Waddeton Court fgins as it is frequently observed that there has been a heavy rainfall in Paignton and perfectly dry at Waddeton Court and vice versa - I am not in position to refute any fgins you may have must leave it to you to do as you think fit

	Jan. 25.	Feb. 27.	Dec. 27.
Greenway Gardens	2.14	.02	.08
Waddeton Court	1.08	.32	.70
Ashprington.	1.70	—	.11
Paignton	1.77	.01	.10

It is recommended that values of 2.08, .02, and .07 ins. be adopted. The total for November is not in agreement with the sum of the daily values, the correct value being 4.56 in. If you concur in the above amendments the totals will be Jan. 7.42, Feb. 5.81, Dec 6.92 in. and the year 48.29 inches. We shall be glad of your comments on these points.

Arthur Jackson
Penalty Reading

H. Cates 17.6.26.

Adopt the suggested values
For use in M.O. 3. R.O.L.

1. The amendments indicated in red ink are adopted ..... 19.6.26.
2. Necessary corrections made in Monthly Return .....
3. „ „ „ „ Weekly (Form 3110) .....

For use in M.O. 2.

4. Necessary corrections noted in Forecast Division .....

N.B.—This paper should be folded so as to bring the printed address outside, and returned immediately. Sealing is unnecessary and defaces or causes a gap in the paper, which is to be filed in the Meteorological Office.

FORM 1090 METEOROLO[illegible] ORGANIZATION.

(*formerly B.B.O. Form A.1*).

REGISTER OF RAINFALL IN 1922.

Kept at West Buckland School

in the County of Devonshire

by E. L. Harries.

Lat. ..... Long. .....

Time of Observation .....

Nearest Railway Station Tilleigh

Diameter of Funnel of Rain Gauge ..... in.

Height of top of Gauge above Ground ..... ft. ..... in.

" " " " Sea Level ..... ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, 62, Camden Square, London, N.W. 1, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Jan. 1, following.

Records taken in Millimetres should not be entered on this form.

Diameter of Funnel of Rain Gauge 5 in.

Height of top of Gauge above Ground 1 ft. 0½ in.

" " " " Sea Level 188 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Jan. 1, following.

Records taken in Millimetres should be entered on Form 1091.

" " " " Sea Level ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W. 1.

AIR MINISTRY.

FORM 1090. METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1923.

Kept at Ashbrook

in the County of Devon

by Rev. H. B. Goyllo

Lat. 50° 31' 5" Long. 4° 5' 50"

Time of Observation 9 a.m.

Nearest Railway Station Whitchurch

Diameter of Funnel of Rain Gauge 5 in.

Height of top of Gauge above Ground 1 ft. 0 in.

" " " " Sea Level 400 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Jan. 1, following.

Records taken in Millimetres should be entered on Form 1091.

A.M. Form 906.

AIR MINISTRY, METEOROLOGICAL OFFICE.

South Kensington, London, S.W. 7.

QUERY FORM.

On examination of the return of observations made at Langstone, Tavistock, 1925

the following queries arise by comparison of the readings with the charts, &c. The Director will be obliged if the book containing the original observations may be referred to and this paper returned, with the required information, as soon as possible.

QUERY.	REPLY.
A comparison of your rainfall return for 1925 with neighbouring stations suggests that the entry on January 26th is unduly high, as shown below. Glenafon, Whitchurch ·29 Ashleigh, " ·26 Langstone, " ·85 Market St., Tavistock ·20 Library, " ·35 It is recommended that a value of ·35 in. be adopted. If you concur in this suggestion, the total for January will become 6·98 in. and that for the year 60·82 inches. We shall be glad to have your comments on this matter. H. G. Carter 17.6.26.	This place is much higher than any of the places you mention. We sometimes get heavy rain here when the other places get far less. "Truth" the rain on 26.1.25 and I am quite satisfied that the result is correct. W. F. Eldridge 23.6.26 Accept observers figure. H.R.B. 25.6.26.

N.B.—This paper should be folded so as to bring the printed address outside, and returned immediately. Sealing is unnecessary and defaces or causes a gap in the paper, which is to be filed in the Meteorological Office.

For use in M.O. 3.

1. The amendments indicated in red ink are adopted.....
2. Necessary corrections made in Monthly Return.....
3. " " " " Weekly (Form 3110).....

For use in M.O. 2.

4. Necessary corrections noted in Forecast Division .....

AIR MINISTRY.

FORM 1090 METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1924.

1642

5 JAN 1925

Kept at Withridge

in the County of Devon

by H. J. Mansfield

Lat. ..... Long. .....

Time of Observation 9 a.m.

Nearest Railway Station Lapford

Diameter of Funnel of Rain Gauge 5 in.

Height of top of Gauge above Ground 1 ft. 2 in.

" " " " Sea Level 600 ft.

Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. An Observer who prefers not to conform to this almost universal rule, should insert the reading at 9 a.m. on January 1st of the following year in the space on the right of this paragraph.

Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Jan. 1, following.

Records taken in Millimetres should be entered on Form 1091.

A.M. Form 906.

AIR MINISTRY, METEOROLOGICAL OFFICE.

South Kensington, London, S.W. 7.

QUERY FORM.

On examination of the return of observations made at Witheridge 1925

the following queries arise by comparison of the readings with the charts, &c. The Director will be obliged if the book containing the original observations may be referred to and this paper returned, with the required information, as soon as possible.

QUERY.	REPLY.
The total for November is given as 3·36 but the sum of the entries is 3·58. The former figure would appear to be correct the error arising from the entry of ·12 on the 11th and ·10 on 13th. A comparison with neighbouring records suggests that these amounts should be entered to December 11th & 13th. The totals for December & for the year would then become 5·59 ins. and 47.09 ins. respectively. We shall be glad to hear whether you concur in these modifications H. L. Carter 29.6.26.	I have no copy of Chart to refer to but I feel sure the conclusion you have arrived at is the correct one and with it I quite agree. H. J. Mansfield June 30/26

N.B.—This paper should be folded so as to bring the printed address outside, and returned immediately. Sealing is unnecessary and defaces or causes a gap in the paper, which is to be filed in the Meteorological Office.

For use in M.O. 3.

1. The amendments indicated in red ink are adopted.....
2. Necessary corrections made in Monthly Return.....
3. " " " " Weekly (Form 3110).....

For use in M.O. 2.

4. Necessary corrections noted in Forecast Division .....

Time of Observation 9. a.m

Nearest Railway Station Yealmpton. G.W.R

Diameter of Funnel of Rain Gauge 5 in.

Height of top of Gauge above Ground ft. 11 in.

" " " " Sea Level 100 ft.

Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. An Observer who prefers not to conform to this almost universal rule, should insert the reading at 9 a.m. on January 1st of the following year in the space on the right of this paragraph.

Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Jan. 1, following.

Records taken in Millimetres should be entered on Form 1091.

FORM 1090. METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1922.

8 JAN 1924

Kept at YELVERTON "(OAKFIELD)"

in the County of DEVON

by Henry Edgcumbe

Lat. 50.29.50 Long. 4.5.40

Time of Observation 8 a.m.

Nearest Railway Station Horrabridge.

Diameter of Funnel of Rain Gauge 5 in.

Height of top of Gauge above Ground 1 ft. 1/2 in.

" " " " Sea Level 534.66 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Jan. 1, following. NONE

Records taken in Millimetres should be entered on Form 1091.

A.M. Form 906.

AIR MINISTRY, METEOROLOGICAL OFFICE.

SOUTH KENSINGTON, LONDON, S.W. 7.

QUERY FORM.

On examination of the return of observations made at Yelverton 1925

the following queries arise by comparison of the readings with the charts, &c. The Director will be obliged if the book containing the original observations may be referred to and this paper returned, with the required information, as soon as possible.

QUERY.

Certain entries on your rainfall return for 1925 are not in good agreement with neighbouring stations as shown below.

	Bere Alston	Yelverton	Redstone
Jan. 1.	1·23	·15	1·68
April 12.	·13	·48	·10
May 12	·03	·80	·06
May 13	–	·30	–

It is recommended that values of 1·15, ·08, ·08, and ·03 inches be adopted. We shall be glad to know whether you concur in this suggestion. The totals for April, Nov. & Dec. are not in agreement with the sums of the daily values. The correct totals, including the above suggested values, will be for Jan. 6·45, April 4·22, May 6·63, Nov. 5.44, Dec 7·51, and for the year 62·60 inches.

We shall be glad to have your comments on these points.

H. L. Carter
17.6.26

REPLY.

Looking up my readings Jan 1st should be 1·16 not ·15.

The other days 12·6·26, 12·5·26, 13·5·26 are as entered at the time of observation, but will agree with the amendments you suggest. i.e. ·08, ·08, & ·03 respectively

Nov. & Dec my additions is at fault.

The corrections you suggest have been taken and my books altered accordingly.

Henry Edgcumbe
21.6.26.

N.B.—This paper should be folded so as to bring the printed address outside, and returned immediately. Sealing is unnecessary and defaces or causes a gap in the paper, which is to be filed in the Meteorological Office.

For use in M.O. 3.

1. The amendments indicated in red ink are adopted.....
2. Necessary corrections made in Monthly Return.....
3. „ „ „ „ Weekly (Form 3110).....

For use in M.O. 2.

4. Necessary corrections noted in Forecast Division.....
